FUJI TOOLS SELECTION 2021

FUJI TOOLS

Power and Precision in Perfect Harmony

**INDUSTRIAL TOOLS.
JAPANESE QUALITY
SINCE 1943**

A DEEP JAPANESE HERITAGE

From the beginning, Fuji has manufactured tools for some of the toughest and most demanding industrial environments in Japan and on the planet. This has resulted in a wide range of robust and long lasting material removal tools that is the preferred choice for metalworking in Japan and many places overseas. Our range of assembly tools and error proofing solutions was born from the needs of the Japanese manufacturing industry and delivers quality and safety together with speed of operation and ergonomic handling.

COMMITMENT TO QUALITY AND TECHNOLOGY

Every Fuji tool, from the simplest to the most sophisticated, is built to the same exacting standards. "Monozukuri", Japanese craftsmanship, is a core value in both manufacturing and design. Over 60 years of non-stop investment in R&D and kaizen manufacturing ensures that our products are built using proven, advanced technologies and provide superior ergonomics, safety and handling. Moreover, our commitment extends beyond our products to include the world we live in. Our production facilities are compliant with both the ISO 9001 and ISO 14001 standards.

**QUALITY
GUARANTEED**

**OUR COMPANY
IS CERTIFIED ISO 9001
QUALITY MANAGEMENT
AND ISO 14001
ENVIRONMENTAL
MANAGEMENT
STANDARDS.**

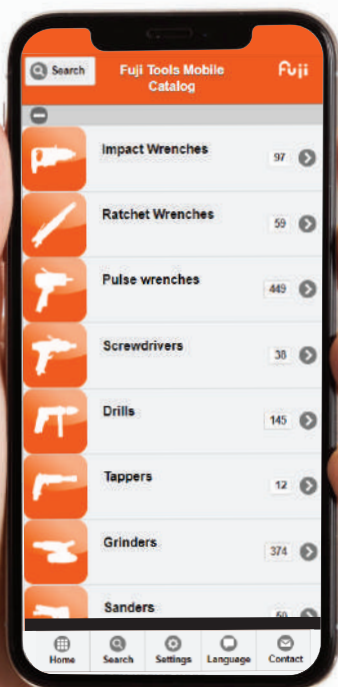

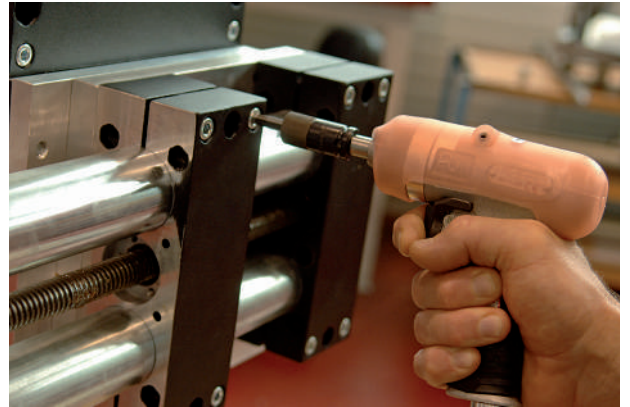

WIDE RANGE OF STANDARD AND SPECIAL PRODUCT

With a catalogue of over 1,400 references, we have one of the most extensive, most cost effective ranges of industrial tools available today. Our engineering team also has a long history of collaborating with customers to design solutions for special needs, both large and small.

COMMITTED TO LONG TERM CUSTOMER SATISFACTION

Fuji Tools are available through our network of authorized distributors that provide highly reactive after-sales service. They ensure that after years of service our products perform just as well as on day one. We support this network through both a dedicated international team in Japan and local market representatives in over 20 countries.

Productivity

- Cleans and removes weld seams up to 3 times faster than typical grinding.
- Can cut up to 3mm welding seam.

Clean work

- Roller guides ensure that only the seam is removed.
- Cutting depth setup with large button and scale for precise work

Easy

- Large handles for controlled movement of the tool. Natural handling position even while working on the floor.
