XGT is a new system with its own tools, batteries, and chargers. A combination of innovative tool design and higher output batteries provide a genuine solution for high demand industrial users.

### Optimum power supply system and Optimum charging system

The XGT range of tools and batteries come with a built-in program, providing digital communication between the battery and tool. Allowing not only for the battery to talk with tool but also the tool to talk to the battery. Battery technology and motor engineering that work together for optimum performance.

Tool ↔ Battery ↔ Battery Charger  
Digital communication

#### Optimum charging system

Auto maintenance system with two cooling fans for providing more optimum fast charging

High durability specifications specially designed for 40Vmax Li-Ion batteries

### 4-LED fuel gauge indicator

### Shock absorption structure

Heavy duty outer casing and cell holder  
Create a space to absorb impact

### Waterproof Triple-layer Structure

prevents cell failure due to water and dust.

### Terminal short-circuit prevention structure

The protection wall is provided between terminals against water and dust.

### High Rigidity Battery Rails

Durable slide in battery rail that holds the battery and the tools firmly and securely to withstand high power products

## Unlocks the full power potential for certain models.

By using the high output battery, the overload indicator setting changes thanks to the smart system, allowing for continuous heavy load work, thereby improving efficiency and unlocking the full power of certain models.

# Rapid Optimum Charging System

It is necessary to cool down before start charging when the battery temperature is high.  
Built-in fan circulates air through the battery before start charging and during the charging process to cool the battery for faster charge time.

The Makita Rapid Optimum Charger communicates with the battery's built-in chip throughout the charging process to optimize battery life by actively controlling current, voltage and temperature.

## Power Converter BAC01

### Power converter powered by Makita portable power pack (BAC01 + PDC1200 / PDC1500)

The device, which converts DC power into AC power, is optimal for a wide range of applications.

#### AC output

50/60 Hz switchable with pure sine wave

#### Max output

Rating value for 4 seconds

**2,800 W(VA)**

Continuous rating output

**1,400 W(VA)**

#### Output port
